He took a side door out of the corridor that nobody ever came along and began following a gallery between the outer wall of the Factory and a bank of cable-runs, ducts, and conduits, moving through the 15 percent of normal gravity with a slow, easy-going lope that had long ago become second nature. Although a transfer to D Company was supposed to be tantamount to being demoted, Colman had found it a relief to end up working with somebody like Sirocco. Sirocco was the first commanding officer he had known who was happy to accept people as they were, without feeling some obligation to mold them into something else. He wasn't meddling and interfering all the time. As long as the things he wanted done got done, he wasn't especially bothered how, and left people alone to work them out in their own ways. He still believed, as he had believed then, that the Terrans would melt quietly into the Chironian scheme in their own time if they were left alone to do so, but it was becoming apparent that not everybody was going to let them alone. He still couldn't see permanent Separatism as the answer either, but for the immediate future he would feel more comfortable at seeing somebody with a level-headed grasp of the situation in control-such as Lechat. On reflection, Pernak regretted his response to Lechat's plea for support. But it was far from too late for him to be able to change that. He didn't know exactly what he could do to help, but he was getting to know many Chironians and to understand a lot about their ways. Aging prematurely from side effects, they had known they would never see Chiron when they brought him aboard the Mayflower II as a boy of eight and sacrificed the few more years that they might have spent on Earth in order' to give him a new start somewhere else. Paradoxically, their health had qualified them favorably in their application to join the Mission since the planning had called for the inclusion of older people and higher-risk actuarial categories among the population to make room for the births that would be occurring later. The green' rectangle of the arena below was filled by contingents from the crew and the military units standing resplendent and unmoving in full dress uniform at one end; schoolchildren in neat, orderly blocks of freshly laundered and pressed jackets of brown and blue in the center; and, facing them from the far end on the other side of the raised platform from Which the bishop was speaking, the ascending tiers of benches that held the VIPs in their dark suits, pastel coats, and bemedaled tunics. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colon, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam. though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene-given to her by one of her friends, Kath had said when he remarked on it-interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians..tongue stuck to the roof of her mouth..".Sure," Driscoll told her.
